Gauge: 24, 26 or 29. Please inquire for other gauges
Substrate: Galvalume® or Galvanized steel
Paint System: SMP or Kynar® 500/Hylar 5000®

TESTING
CLASS A – FIRE RATING
Metal is a noncombustible material and therefore holds the highest fire rating available - Class A. Therefore, many insurance companies offer discounts on fire insurance for homes with metal roofs. Please note that the fire classification of the material is not necessarily the fire classification of the entire roof; the roof will be fire rated based on all materials present.

Oil canning is a natural occurrence in metal panels and is not cause for panel rejection. Prior to ordering and installing roofing panels, always check local building code requirements for additional restrictions that may apply to your project. If necessary, consult a design professional for assistance.
